

CALL FOR ABSTRACTS

As a practicing physician, no doubt you've made many interesting diagnoses, treated challenging conditions and managed complex patients. The upcoming Patient Centered Meeting is exactly about this. Insightful patients and doctors can teach us as well as your colleagues just as much as large clinical trials. We call you to share this valuable knowledge and experience; **Deadline for Abstract Submission: July 30, 2019**

SPONSORSHIP & EXHIBITION

You have this opportunity to easily and effectively reach hundreds of the world's leading international medical professionals. For More Information please contact:
Tuvia Shmuel, Industry Liaison Manager | E-mail: Tshmuel@paragong.com

LANGUAGE

The official language of the conference is English. All abstract submissions and presentations are to be conducted in English.

CME

An application has been made to the UEMS EACCME® for CME accreditation of this event. Additional details will be published on the conference website

PATIENT CENTERED MEETING On Diabetes, Dyslipidemia and Hypertension

DON'T MISS OUT!

October 31 - November 3 | 2019 | Vienna, Austria

Website: <http://pcmddh.com/>

Welcome Letter

Dear Colleagues,

We are excited to announce the inauguration of a new series of medical education experience – Patient Centered Meeting. **The first will focus on diabetes, hypertension and dyslipidemia.**

The program is aimed to empower clinicians translating current knowledge to clinical practice: from guidelines to personalized medicine through workshops, case-studies, meet the experts sessions and round table discussions. Importantly, you will be able to share your own clinical cases that will allow your peers to learn from. The meeting will take place in beautiful Vienna.

A team of leading experts will be there for you and we are confident that the insights and tools you will obtain from the meeting will be implemented in your clinical practice.

The conference is designed for all those who are managing patients at risk for cardiovascular diseases and who are working hard to prevent this number one contributor of global (and individual!) and mortality.

We look forward to seeing you in Vienna, and we are confident that this meeting would provide you with an enriching experience.

Sincerely,

Yehonatan Sharabi
